Malvern
Warehouse and Distribution Solutions

Integrated, Multi-Carrier Shipping Software from $149/mo

Company Description:
Malvern Systems develops affordable, multi-carrier shipping software designed to streamline shipping operations and to reduce costs. With the ability to economically accommodate unique customer requirements and challenges, Malvern's typical return on investment is extremely rapid.

Product Description:
The Malvern Manifest System is a single or multiple workstation, PC-based shipping system that seamlessly integrates with your existing business systems.

Carriers Supported:
UPS, FedEx, US Postal, DHL, UPS Mail Innovations, FedEx SmartPost, DHL Global Mail, Spee-Dee Delivery, OnTrac, LTL (less than truckload), custom carriers and more.

Available Features:
Automatic Rate Shopping, HTML Email Notification, Address Correction, Batch Processing, Automatic Package Tracking, Multiple Networked Stations, Internet Postage using Endicia, Commercial Invoice & Bill of Lading printing, LTL Rating and much more.

Integration Technology:
Malvern uses a sophisticated, open source vbScript-based engine for integration. Interface technologies include ODBC, XML, TCP/IP, text files and much more. Integrates with dozens of popular packages as well as supporting custom integration to virtually any open host system, database, or file(s). In addition, complex business rules can be implemented and maintained with ease.

$149/mo Price Includes:
